

# Liquid ring vacuum pumps

with magnetic coupling

SIHI® Pumps

## LEM 90, LEM 125, LEM 150, LEM 250

**Pressure range:** 33 to 1013 mbar  
**Suction volume flow:** 20 to 200 m³/h

### CONSTRUCTION TYPE

SIHI liquid ring vacuum pumps with magnetic coupling are displacement pumps of simple and robust design meeting high demands on tightness. Two liquid surrounded sleeve bearings of tungsten and silicon carbide (WC / SiC) bear the shaft axially and radial. The application of high-grade magnetic materials with high density of energy guarantees the transmission of the nominal torque and safety during the start-up phase and in case of overload.

The modular magnetic system makes possible the optimal adaptation to different operating conditions. The main components of the pumps mostly are equal to those of the standard pumps, the connecting dimensions are identical.

The material design can be adapted to the operating conditions.

### APPLICATION

The vacuum pumps with magnetic coupling are suitable for handling and exhausting of nearly all dry and humid gases. They are applied wherever extremely high demands on tightness exist which cannot be met by pumps with shaft seals.

### NOTE

The main fields of application are in the chemical and pharmaceutical industry where polluting, unhealthy or dangerous media are to be handled. Many different process vapours can be exhausted and the generated condensate possibly can be used as service liquid for the pump.

For that purpose the service liquid, separated from the gas in a liquid separator, is run in a circuit. For the cooling of the system a heat exchanger is arranged in the circulating liquid line.

### GENERAL TECHNICAL DATA

Pump type	unit	LEM 90	LEM 125	LEM 150	LEM 250
Nominal speed	rpm	1450			
Power of the electric motor	IP 55 <sup>1)</sup>	3	4	5,5	7,5
	EEx e II T3 <sup>1)</sup>	3,6	3,6	5	6,8
Max. compression over pressure	bar	0,3			
Max admissible pressure difference	bar	1,1			
Hydraulic test (over pressure)	bar	3			
Moment of the inertial of the rotating pump parts and of the water filling (without outer magnet)	kg · m <sup>2</sup>	0,24	0,26	0,27	0,3
Sound pressure level at a suction pressure of 80 mbar	dB (A)	65			
Max. gas temperature	dry	100			
	saturated	50			
Service liquid	max. admissible temperature	50			
	max. viscosity	4			
	max. density	1200			
	volume up to shaft level	3	3,5	4	5
Max. flow resistance of the heat exchanger	bar	0,2			
Leakage	$\frac{\text{mbar} \cdot \text{l}}{\text{s}}$	$< 1 \cdot 10^{-3}$			

The combination of several limiting values is not admissible.

<sup>1)</sup> normally

The dimensioning of the magnetic coupling and of the electric motor depends on the physical data of the service liquid and of the suction and discharge pressure of the pump

## Material designs LEM 90, LEM 125, LEM 150 with magnetic coupling

## Sectional drawing LEM 250 with magnetic coupling

**Suction volume flow and power absorption LEM 90, 125, 150, 250 with magnetic coupling**

The operating data are applicable under the following conditions:

- pumping medium:
  - dry air: 20°C \_\_\_\_\_
  - water vapour saturated air : 20°C .....
- service liquid:
  - water: 15°C

Compression pressure 1013 mbar (atmospheric pressure)  
 The suction volume flow is applied to the suction pressure  
 Tolerance of the operating data 10%  
 Max. fresh water need with lowest suction pressure

**Dimension table LEM 90, LEM 125, LEM 150 with magnetic coupling**

\* The magnet size depends on the load range of the pump. In case of deviation from standard, please request further information and give details of your problems.

\*\*Only applicable when ordering pumps without motor

### Motor selection table

		motor enclosure IP 55 n = 1450 rpm			motor enclosure EEx e II T3 n = 1450 rpm		
		power kW	size	motor-designation	power kW	size	motor-designation
LEM 90		3,0	100 L	LB	3,6	112 M	MK
LEM 125		4,0	112 M	MB	3,6	112 M	MK
LEM 150		5,5	132 S	NB	5,0	132 S	NK
LEM 250		7,5	132 M	PB	6,8	132 M	PK

### Example for ordering:

The construction size LEM 150 AF 2AZ 4B 4 with 5,5 kW three-phase ac motor (50 Hz, 400 VΔ) 1450 rpm has the complete order number:

**LEM • 150 AF 2AZ 4B 4 NB**

If motors with the other voltage or frequency are required a special information should be given.

On delivery the point (•) in the fourth place of the type code is replaced by a letter in the factory.
